# The Natural Alternative

Burning Natural Soy Wax Candles is good for the environment, both when we extract the raw product from nature and then again when we burn the candle.

Natural Soy Candles are made from totally renewable sources and when you purchase a Soy Candle you are helping to support farmers rather than supporting the big petroleum companies.

Natural Soy Candles are also fully biodegradable, so if you happen to spill some you can easily clean it up with warm soapy water. These candles are of an exceptionally high quality and you are guaranteed of a fragrant candle emitting it's beautiful scent from the first time you light it to the last time you extinguish it.

Now for the ingredients of the candle, it is made up of 100% Natural Soy Wax along with a blend of Aroma & Essential Oils, the wick is made of natural cotton and the candle is coloured with natural vegetable dyes, so we produce a candle that is as close to fully natural as possible.

The other amazing thing about these candles is their burning times. You will be surprised just how long they burn for, generally up to three times longer than other candles. However, the proof of enjoyment is in the burning of these beautiful candles, with so many fragrances to choose from, your biggest decision will be which one will I burn today?

*So now it's time to  
Sit back, Relax & Enjoy...*
